

IN-BUILDING WIRELESS SERVICES

In-building Wireless Systems are used to improve the communication of fixed and mobile devices, as well as enhance productivity, safety, and security. ComNet can support your business by helping you develop a wireless strategy and implementing wireless systems.

ABOUT US

Since 1984, ComNet Communications LLC has been installing and maintaining mission-critical network infrastructure systems for enterprise companies.

In addition to traditional voice/data cabling, we have developed the capabilities and reputation as an industry leader for data center, audio visual, physical security and wireless installations. Our nationwide footprint makes us the ideal choice for coast to coast support and national rollouts.
